

LUCILIA ROSA

SOFTWARE DEVELOPER

São Paulo, Brazil

Full Stack and Automation Developer with experience in software development, process automation, data analysis, and technical support. My career started in infrastructure and networking and naturally evolved into software engineering and automation-focused solutions. Currently working with **Python, SQL, Power BI, and Microsoft Power Platform** to build automations, dashboards, and internal tools that reduce manual work and improve operational efficiency. Experienced in both backend and frontend development, with strong analytical and problem-solving skills. Also experienced in systems support, troubleshooting, technical documentation, and corporate environments. Continuously improving technical skills in full stack development, cloud technologies, and software engineering.

SKILLS

- Python
- Javascript | React
- Power Platform
- APIs REST
- HTML | CSS
- SQL
- GIT | GitHub
- System Integration

EXPERIENCE

SENAI

Systems Developer • Jul 2025–Present

- Developed and maintained analytical dashboards using Power BI
- Built Python automation scripts for data processing and integration
- Modeled and manipulated data using SQL
- Implemented automated workflows with Power Automate
- Contributed to data-driven culture initiatives and operational optimization
- **Project:** Developed a Python automation workflow to process Excel spreadsheets, structure data, and automatically deliver AI-generated analysis reports by email. The solution reduced an operational process from nearly one full day to less than one hour

VERTEM

Support Analyst • Mar 2022–Jul 2025

- Analyzed and resolved incidents across enterprise platforms and systems
- Performed frontend enhancements using HTML, CSS, and JavaScript
- Executed SQL queries, data analysis, and database manipulation
- Produced and maintained technical documentation for systems and processes
- Trained internal teams and new employees on operational workflows and tools
- **Project:** Developed Python scripts to automate daily and weekly report generation, reducing manual activities, minimizing operational errors, and allowing the team to focus on strategic tasks

TELIUM NETWORKS

Network Technician • Apr 2018–Mar 2022

- Diagnosed and resolved network infrastructure issues
- Monitored network assets, including wireless radios, backbones, and telephony equipment
- Provided technical support for enterprise clients and field technicians
- Managed access control and infrastructure within data center environments
- **Project:** Participated in a network asset mapping project to identify equipment requiring maintenance or replacement, contributing to infrastructure standardization and reliability initiatives

EDUCATION

Postgraduate Degree — Full Stack Development

DESCOMPLICA • Mai 2023–Out 2024

Associate Degree in Systems Analysis and Development

FATEC • Fev 2022–Dez 2024

Associate Degree in IT Management

FATEC • Fev 2015–Dez 2017

Technical Program in Computer Networks

SENAI • Jul 2012–Jul 2014

LANGUAGES

Intermediate English

Exchange program at St. George International College, Vancouver, Canada — Jul 2019 and Ago 2026
