SKILLS

- Python
- SQL
- JavaScript
- HTML
- CSS
- React
- REST APIs
- System Integration
- Power Platform
- Git
- GitHub
- VS Code

EXPERIENCE

SENAI

Software Developer • Jul 2025–Present

- Developed Python applications and automation solutions to eliminate manual processes and improve operational efficiency.
- Designed and executed SQL queries for data extraction, validation, and business rule implementation.
- Integrated internal systems, databases, SharePoint environments, and external services to automate information flows.
- Developed automated reporting and notification processes using Python and Microsoft technologies.
- Collaborated with business teams to identify process improvement opportunities and translate requirements into software solutions.

Key Achievement: Developed a Python-based ETL automation that processed over 100 student satisfaction surveys, standardized outputs, and generated automated reports, reducing a multi-day manual workflow to a single automated process completed in approximately one hour.

VERTEM

Support Analyst • Mar 2022–Jul 2025

- Analyzed and resolved incidents across enterprise platforms and systems
- Performed frontend enhancements using HTML, CSS, and JavaScript
- Executed SQL queries, data analysis, and database manipulation
- Produced and maintained technical documentation for systems and processes
- Trained internal teams and new employees on operational workflows and tools

Key Achievement: Developed Python scripts to automate daily and weekly report generation, reducing manual activities, minimizing operational errors, and allowing the team to focus on strategic tasks

TELIUM NETWORKS

Network Technician • Apr 2018–Mar 2022

- Diagnosed and resolved network infrastructure issues
- Monitored network assets, including wireless radios, backbones, and telephony equipment
- Provided technical support for enterprise clients and field technicians
- Managed access control and infrastructure within data center environments

Key Achievement: Participated in a network asset mapping project to identify equipment requiring maintenance or replacement, contributing to infrastructure standardization and reliability initiatives

EDUCATION

Postgraduate Degree — Full Stack Development

DESCOMPLICA • May 2023–Oct 2024

Associate Degree in Systems Analysis and Development

FATEC • Feb 2022–Dec 2024

Associate Degree in IT Management

FATEC • Feb 2015–Dec 2017

Technical Program in Computer Networks

SENAI • Jul 2012–Jul 2014

LANGUAGES

English — Intermediate

Exchange program at St. George International College, Vancouver, Canada — Jul 2019 and Ago 2026

Portuguese — Native
